I begin to have my doubts whether there is to be a caneral battle at Yorktown, for some time to cooled gameral battle at Yorktown, for some time to come at least. During the earlier part of the week a creat number of distinguished military men were in Richmond, and conferences were undoubtedly held as to the pelicy to be pursued in the Peninsula. If this French nister has come here on an erroud of peace making, he may as well go back the way he came. But there is a different message which he may have brought, and a different line of policy for the French government, which could not fail to lend to results of the last importance. If that government proposes to make any effect-nal interference in this business, it must be an armed interference. Flects and strates are pleniful with the Emperor of France. If he wants peace in America, be can make it by using them; and it he will employ his power to procure the recognition and independence at the Confederacy, there is no price which the people would resitate to pay for that assistance.
